

Online payment collection service **PayGate**

Automate the collection process of your business electronically, from the generation of the payment request to the completion of the transaction.

Enable your customers to make fast, secure and free of charge payments to you, from the bank of their choice, with instant crediting of your account.

Benefits for both your business and your customers

An Interbank solution that supports payments from banks participating in the “IRIS online eCommerce” collection service, in a single/uniform way (Eurobank, NBG, Piraeus Bank, Alpha Bank, Viva Payment Services S.A.)

Option for easy transition to electronic invoicing and archiving (ERP automation)

Real time updates and reconciliation of your company's receivables per amount due

Unique payment reference (indicatively, a payment code), set by the company for the purposes of identifying and processing the completed payments

Option for Instant crediting of your company's bank account

Your customers can make a **full or partial payment**, per invoice due

You can select the frequency at which you will be sending the payment notifications to your customers, and you will receive updates for every collection

Protection of both your business and your customers from incorrect payments

Easy interconnection with the service, making use of modern solutions in accordance with your needs

Saving time and resources in the collection process and workflow
