## INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Eurobank EFG Bulgaria AD

### Report on the Financial Statements

We have audited the accompanying financial statements of Eurobank EFG Bulgaria AD (the "Bank") which comprise the balance sheet as of 31 December 2009 and the income statement, statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended and a summary of significant accounting policies and other explanatory notes.

#### *Management's Responsibility for the Financial Statements*

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards as adopted by the European Union. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

#### *Auditor's Responsibility*

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

This version of our report/the accompanying documents is a translation from the original, which was prepared in Bulgarian. All possible care has been taken to ensure that the translation is an accurate representation of the original. However, in all matters of interpretation of information, views or opinions, the original language version of our report takes precedence over this translation

*Opinion*

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Bank as of 31 December 2009, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

*Report on Other Legal and Regulatory Requirements*

Management is also responsible for preparing the Annual Report in accordance with the Accounting Act.

We are required by the Accounting Act to express an opinion whether the Annual Report is consistent with the annual financial statements of the Bank.

In our opinion, the Annual Directors' Report set out on pages 1 to 7 is consistent with the accompanying financial statements of the Bank as of 31 December 2009.

## DIRECORS' REPORT

The management presents the annual Directors' report as of 31 December 2009.

## BUSINESS DESCRIPTION

Eurobank EFG Bulgaria AD (the Bank) provides retail, corporate banking and investment banking services in Bulgaria. Its Head Office is located in Sofia. The address of its registered office is as follows: 14 Tsar Osvoboditel Blvd, 1048 Sofia, Bulgaria.

## BUSINESS OVERVIEW

### Development and results from the business activity

Eurobank EFG Bulgaria is a leading universal bank in Bulgaria, part of EFG Group international financial group. The Bank provides a broad range of banking services to local and international customers through its nationwide branch network and customer service desks within post offices throughout the country.

Developing innovative products and services and emphasizing on quality, the Bank constantly holds stable market position and builds long-term relations of cooperation and trust with its customers. The good image and the visibility of the offices all over the country allowed the Bank to attract new customers and to gain the confidence of the existing clients. The Bank continues to meet the challenges related to the increased competition in the banking sector and financial culture of the clients.

The global financial crisis, which began in 2007, led to a lack of liquidity on the capital markets, lower liquidity positions in the banking sector, higher interest rates for the granted loans and extreme volatility of the financial markets. The banking system in Bulgaria started to feel the effects of the global financial crisis in the last months of 2008. In view of the difficult conditions, the main strategic priorities of the Bank for 2009 were focused on capital adequacy management, maintaining solid liquidity position, deposit base growth, and cost optimization. The Bank's strategy emphasizes on efficient operating cost management, prudent risk management and solid capitalization, and aims at achieving sustainable asset and profit growth.

Total assets of the Bank reached BGN 6,020 million as of 31 December 2009, increased by 11% compared to 2008. The solid brand image and the well-developed branch network contributed to the strong relationship between the bank and its existing and new clients. The bank plans to develop its product range further, in view of the evolving, dynamic and changing needs of its customers. Taking into consideration the current difficult economic environment, the bank will consider new opportunities for attracting new funding, in order to provide adequate financing to households and businesses.

The operating income of the Bank reached BGN 284 million in 2009 and the operating expenses excluding impairment charge for the year amounted to BGN 155 million. The net profit of the Bank for the year ended 2009 amounted to BGN 16 million.

(All amounts are shown in BGN thousands unless otherwise stated)

### Share Capital

The share capital of the Bank is sufficient to maintain capital adequacy cover for its risk-weighted assets. The capital base of the Bank as of 31 December 2009 reached BGN 620 million (calculated in accordance to the Capital Adequacy Ordinance 8 of the Bulgarian National Bank).

In February 2009, on the Extraordinary Shareholders' meeting a decision was taken to increase the capital of the Bank by BGN 206,575 thousand, which was registered in July 2009 through the issue of new 206,574,765 ordinary shares with nominal value of 1 BGN.

The Bank has 209 retail network locations and 2,023 customer service desks in post offices throughout the country and employs 2,902 people.

The Bank finances its operations mainly with funds attracted from its clients. The sound market position of the Bank and its substantial deposit market share in particular, confirm that the deposit products offered by the Bank are competitive. As of 31 December 2009 attracted funds from clients amounting to BGN 4,333 million increased by 13% compared to 2008. With regards to preserving normal operating environment in the Bank, it is essential that optimal liquidity levels be maintained constantly. As of 31 December, the Bank's ratio of liquid assets is 18.8%.

As of 31 December 2009 the Bank's net loan portfolio amounts to BGN 4,276 million, which represents a 15.1% increase compared to 2008. The Bank's balance sheet provisions for impairment amount to BGN 169 million.

As at 31 December 2009 the Bank's Basel II compliant capital adequacy ratio is 13.2%, much higher than the 12% minimum set by the Bulgarian National Bank. The reinforcement of our capitalization increases our potential for further growth and utilization of opportunities.

### Important events that have occurred during the financial year

Eurobank EFG Bulgaria enriched its product portfolio with the launch of a number of new products and services it offered for retail, small business and wholesale clients. The Bank developed several new long and short term savings products in answer to the diverse financial needs in the market, among which was the launch of 12-month deposit account with growing interest, incremented every three months – called Active Money.

In March 2009 as part of its ongoing effort to support its clients and Bulgarian society the Bank has introduced several new measures designed to meet individuals' and businesses' needs in the prevailing economic conditions in the country. The measures provided for small and medium enterprises new loans, amounting up to BGN 20 million in coordination with the Bulgarian Development Bank.

In June 2009 the Bank has launched a new service aiming to protect borrowers in case of unemployment or health problems. The Payment Protection Program allows clients to insure their consumer loan installments against unforeseen circumstances. The program protects not only the monthly obligations, but the full loan amount as well under special circumstances connected to the occurrence of a temporary or permanent disability.

In October 2009 the Bank launches a new Safe Home mortgage loan with a fixed interest rate for the first two years for loans in euro. The Safe Home loan comes with a large set of additional benefits. The Bank is the first bank on the Bulgarian market that offers an Unemployment and Life insurance package with house loans.

(All amounts are shown in BGN thousands unless otherwise stated)

The Bank managed to secure major deal attracting considerable financing from European Investment bank (EIB). The Bank and the European Investment bank signed in October 2009 BGN 97.8 million credit line for financing investment projects and working capital of small and medium sized enterprises in Bulgaria. This was the first credit line agreement between the Bank and the EIB and serves as a testament to both financial institutions' commitment to strengthening the development of SMEs in Bulgaria. Loans under this credit line will offer SMEs competitive pricing and a tenor of minimum 2 years.

The Bank started offering credit products for the small and medium sized enterprises. The financing comes from a credit line from the European Bank for Reconstruction and Development (EBRD) for the amount of BGN 48.9 million. The funds will be granted as working capitals and investment loans. The financing, which will be allocated for medium term credits for maximum value of BGN 244 thousand. The primary purpose is to fund investment projects of SMEs with at least 2 years of market experience, which have to be new clients for the bank in order to fulfill EBRD's criteria. The Bank's existing clients can be also eligible for funding from this credit line on the condition that they have not taken any loans from the bank over the past 2 years.

The Bank has been awarded numerous prizes and distinctions in 2009. Among these, the more prominent awards were the prestigious Best Financial Product award for its Mega Savings Account at the specialist financial exhibition "Banks, Investment, Money", the prize in category "Ethical and responsible conduct towards stakeholders" in the competition for socially responsible company of the year, organized by "Pari Daily" newspaper with the assistance of Deloitte Bulgaria, the first prize in the category "Investor in Environment" at the Sixth Responsible Business Awards of the Bulgarian Business Leaders Forum (BBLF). The Bank was also announced as Top Rated in offering custody services to local institutional clients in Bulgaria by Global Custodian Magazine. At the end of 2009 the Bank won HR recognition. The Bank's induction training project for new employees "Eurobank EFG Start" was awarded in the framework of the annual HR awards of the Bulgarian Human Resource Management and Development Association (BHRMDA)

## SHARE CAPITAL STRUCTURE

## **5. The Contracts under Article 240b of the Commerce Act**

The Bank has not entered into contracts specified in Article 240b, paragraph 1 of the Commerce Act during 2009.

### **Group structure**

Eurobank EFG Bulgaria does not have any subsidiaries as at 31 December 2009 and therefore no consolidated financial statements are prepared at this entity level.

(All amounts are shown in BGN thousands unless otherwise stated)

### OBJECTIVES FOR 2010

The Bank's strategic priorities for 2010 are focused on increasing the profitability and maintaining the market position of the Bank while closely monitoring the lending portfolio quality and strengthening the liquidity position.

In 2010 the Bank will place emphasis on deposit gathering and liquidity management as prerequisites for controlled expansion of the lending portfolio. The cost of funding will be under constant attention as being the most important factor for the pricing of the existing and the new loans.

The general strategy of the bank remains to be the bank of first choice, providing the most innovative and best quality products and services while meeting the constantly evolving expectations of the customers thus creating value for them and its shareholders.

### MANAGEMENT RESPONSIBILITIES

The Directors are required by Bulgarian law to prepare financial statements each financial year that give a true and fair view of the financial position of the company/the group as at the year end and its financial results. The management has prepared the enclosed financial statements in accordance with IFRS.

The Directors confirm that suitable accounting policies have been used.

The Directors also confirm that the legislation applicable for banks in Bulgaria has been followed and that the financial statements have been prepared on a going concern basis.

The Directors are responsible for keeping proper accounting records, for safeguarding the assets and for taking reasonable steps for the prevention and detection of potential fraud and other irregularities.

## Notes to the financial statements

### General information

Eurobank EFG Bulgaria AD (the Bank) provides retail, corporate banking and investment banking services in Bulgaria. Its Head Office is located in Sofia and it has 209 network locations (2008: 223) and 2,023 customer service desks in post offices throughout the country (2008: 2,023). The address of its registered office is as follows: 14 Tsar Osvoboditel Blvd, 1048 Sofia, Bulgaria. The Bank employs 2,902 people (2008: 2,889).

### Accounting policies

The principal accounting policies adopted in the preparation of these financial statements are set out below.

#### A. Basis of preparation

The financial statements of the Bank have been prepared in accordance with International Financial Reporting Standards as adopted by the European Union and International Financial Reporting Standards issued by the IASB and in particular with those IFRS standards and IFRIC interpretations issued and effective or issued and early adopted as at the time of preparing these statements.

The policies set out below have been consistently applied to the years 2008 and 2009. Where necessary, comparative figures have been adjusted to conform to changes in presentation in the current year.

##### *(a) Amended and new standards and interpretations effective in 2009*

- IAS 1, Revised - Presentation of Financial Statements
- IAS 23, Amendment - Borrowing Costs
- IFRS 1 & IAS 27, Amendments - Cost of an Investment in a Subsidiary, Jointly controlled Entity or Associate
- IAS 32 and IAS 1, Amendment - Puttable Financial Instruments and Obligations Arising on Liquidation
- IAS 39 and IFRIC 9, Amendments to Embedded derivatives
- IFRS 2, Amendment - Vesting Conditions and Cancellations
- IFRS 7, Amendment - Financial Instruments: Disclosures
- IFRS 8, Operating segments
- IFRIC 13, Customer Loyalty Programmes
- Amendments to various Standards that form part of IASB's Annual Improvement Project (issued May 2008)

##### *(b) Standards and Interpretations issued but not yet effective*

- IAS 24, Amendment - Related Party disclosures (not yet endorsed by EU)
- IAS 27, Revised - Consolidated and Separate Financial Statements (effective 01 January 2010)
- IAS 32, Amendment - Classification of Rights Issues (effective 01 January 2011)

(All amounts are shown in BGN thousands unless otherwise stated)

### Notes to the financial statements

#### A. Basis of preparation (continued)

- IAS 39, Amendment - Eligible Hedged Items (effective 01 January 2010)
- IFRS 2, Amendments - Group Cash settled Share based payment transactions (not yet endorsed by EU)
- IFRS 3, Revised - Business Combinations (effective 01 January 2010)
- IFRS 9, Financial Instruments (not yet endorsed by EU)
- IFRIC 14, Amendment - Prepayments of a Minimum Funding Requirement (not yet endorsed by EU)
- - IFRIC 15, Agreements for the Construction of Real Estate (effective 01 January 2010)
- IFRIC 16, Hedges of a Net Investment in a Foreign Operation (effective 01 January 2010)
- IFRIC 17, Distributions of Non-cash Assets to Owners (effective 01 January 2010)
- IFRIC 19, Extinguishing Financial Liabilities (not yet endorsed by EU)
- Amendments to various Standards that form part of IASB's Annual Improvement Project (issued April 2009, not yet endorsed by EU)

The application of the above mentioned standards and interpretations is not expected to have a material impact on the Bank's financial statements in the period of the initial application. IAS 1 affects the presentation of owner changes in equity and of comprehensive income. It does not change the recognition, measurement or disclosure of specific transactions and other events required by other IFRSs.

The financial statements have been prepared under the historical cost convention, as modified by the revaluation of land and building, investment property, available-for-sale investment securities, financial assets and financial liabilities held at fair value through profit or loss, and all derivative contracts.

The preparation of financial statements in conformity with IFRS requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on Management's best knowledge of current events and actions, actual results ultimately may differ from those estimates.

(All amounts are shown in BGN thousands unless otherwise stated)

## Notes to the financial statements (continued)

### B. Foreign currencies transactions

#### Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the Bank operates ('the functional currency'). The financial statements are presented in the national currency of Bulgaria, Leva (BGN), which is the Company's functional and presentation currency.

#### Transactions and balances

Foreign currency transactions are translated into the functional currency using the Central Bank's exchange rates prevailing at the date of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognized in the income statement. Such balances are translated at the Central bank's year-end exchange rates.

Changes in the fair value of monetary securities denominated in foreign currency classified as available for sale are analyzed between translation differences resulting from changes in the amortized cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in the amortized cost are recognised in profit or loss, and other changes in the carrying amount are recognised in equity.

At 31 December 2009, monetary assets and liabilities are translated at the reference Central Bank exchange rate – BGN 1 for EUR 0.5113 (2008: BGN 1 for EUR 0.5113) and BGN 1 for USD 0.7331 (2008: BGN 1 for USD 0.72081).

### C. Interest income and expense

Interest income and expense are recognized in the income statement for all interest bearing instruments on an accrual basis using the effective interest method. The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period using effective interest rate. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to the net carrying amount. When appropriate the Bank uses a shorter amortization period. This is the period to the next reprising date when the market rates are changed before the expected maturity of the instrument. When calculating the effective interest rate, the Bank estimates cash flows considering all contractual terms of the financial instrument, but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Interest income includes coupons earned on fixed income investment and trading securities.

When loans become doubtful of collection, they are written down to their recoverable amounts and interest income is thereafter recognized based on the interest rate that was used to discount the future cash flows for the purpose of measuring the recoverable amount.

(All amounts are shown in BGN thousands unless otherwise stated)

### Notes to the financial statements (continued)

#### D. Fees and commissions income and expense

Fees and commissions, except for those, which form part of the effective interest rate of the instrument, are generally recognized on an accrual basis when the service has been provided.

Loan commitment fees that are likely to be drawn down are deferred and recognized as an adjustment to the effective interest rate on loans. Credit card fees are recognised in commission income.

#### E. Financial assets

The Bank classifies its financial assets in the following categories: financial assets at fair value through profit or loss; available-for-sale, loans and receivables and held-to-maturity investments financial assets. Management determines the classification of its investments at initial recognition.

##### (a) Financial assets at fair value through profit or loss

This category includes financial assets held for trading.

A financial asset is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing in the near term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. Derivatives are also categorized as held for trading.

Financial assets held for trading are initially recognized at fair value excluding transaction costs and subsequently re-measured at fair value based on current bid prices at the reporting date. All related realized and unrealized gains and losses are included in net trading income in the period in which they arise. Interest earned whilst holding financial assets held for trading is reported as interest income.

##### (b) Available-for-sale

Available-for-sale investments are those intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices.

Available-for-sale investments are initially recognized at fair value plus transaction costs and are subsequently re-measured at fair value based on current bid prices or amounts derived from cash flow models. Gains and losses arising from changes in the fair value of available-for-sale financial assets are recognized directly in equity. When an available-for-sale financial asset is derecognized or impaired, the cumulative gain or loss previously recognized in equity is recognized in profit or loss. Interest calculated using the effective interest method is recognized in the income statement. Dividends on available-for-sale equity instruments are recognized in the income statement when the Bank's right to receive payment is established.

Purchases and sales of financial assets at fair value through profit or loss, held to maturity and

Available for sale are recognized at settlement date – which is the date the Bank actually trades the relevant assets.

The fair values of quoted investments in active markets are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the Bank establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, discounted cash flow analysis and other valuation techniques consistent with the specific features of the securities market in Bulgaria.

(All amounts are shown in BGN thousands unless otherwise stated)

#### Notes to the financial statements (continued)

#### E. Financial assets (continued)

##### (b) Available-for-sale (continued)

Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or where the Bank has transferred substantially all risks and rewards of ownership. Financial liabilities are derecognized when they are extinguished – that is, when the obligation is discharged, cancelled or expires.

##### (c) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than: (a) those that the entity intends to sell immediately or in the short term, which are classified as held for trading, and those that the entity upon initial recognition designates as at fair value through profit or loss; (b) those that the entity upon initial recognition designates as available for sale; or (c) those for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration.

##### (d) Held-to-maturity

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Bank's management has the positive intention and ability to hold to maturity. If the Bank sells other than an insignificant amount of held-to-maturity assets, the entire category is tainted and reclassified as available for sale.

Held-to-maturity investments are carried at amortized cost using the effective interest method, less any provision for impairment. Interest earned whilst holding investment securities is reported as interest income. The Bank assesses its intention and ability to hold its held-to-maturity investments to maturity not only when those financial assets are initially recognized, but also at each subsequent balance sheet date.

#### F. Sale and repurchase agreements

Securities sold subject to repurchase agreement ('repos') are retained in the financial statements as trading securities and are reclassified in the financial statements as pledged assets when the transferee has the right by contract or custom to sell or repledge the collateral; the counterparty liability is included in amounts due to other banks, or deposits due to customers, as appropriate.

Securities purchased under agreements to resell ('reverse repos') are recorded as loans and advances to other banks or customers, as appropriate. The difference between sale and repurchase price is treated as interest and accrued over the life of repo agreements using the effective interest method.

Securities lent to counterparties are also retained in the financial statements. Securities borrowed are not recognized in the financial statements, unless these are sold to third parties, in which case the purchase and sale are recorded with the gain or loss included in trading income. The obligation to return them is recorded at fair value as a trading liability.

(All amounts are shown in BGN thousands unless otherwise stated)

#### Notes to the financial statements (continued)

#### G. Derivative financial instruments and hedge accounting

Derivatives are financial instruments :

- (a) whose value is changed in response to the change in specified interest rate, financial instrument price, foreign exchange rate , index of prices and rates, credit rates or credit index or other variable;
- (b) that requires no initial net investment or an initial net investment is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors;
- (c) that are settled at a future date.

Derivative financial instruments including currency swaps, interest rate swaps, currency forwards, options and futures are initially recognized in the balance sheet at cost (including transaction costs) and subsequently are re-measured at their fair value. Fair values are obtained from quoted market prices, discounted cash flow models and pricing models as appropriate. The positive fair value of the derivatives is carried as asset and the negative fair value is carried as liability. The changes in the fair value of derivatives are included in the income statement.

The Bank has not entered into transactions where the fair value was different from the transaction price. The best evidence of fair value at initial recognition is the transaction price (i.e., the fair value of the consideration given or received), unless the fair value of that instrument is evidenced by comparison with other observable current market transactions in the same instrument (i.e., without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets.

#### Fair value hedge:

Hedge accounting is used for derivatives designated as hedges of the fair value of recognized assets (fair value hedges) provided certain criteria are met.

The Bank documents, at the inception of the transaction, the relationship between hedged items and hedging instruments, as well as its risk management objective and strategy for undertaking various hedge transactions. The Bank also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values.

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. Effective changes in fair value of interest rate swaps and related hedged items are reflected in 'net trading income'. Interest expense and interest income from hedging derivatives and hedged assets are recognised within 'interest income' and 'interest expense' in the income statement. Any ineffectiveness is recorded in 'net trading income'.

If hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item for which the effective interest method is used is amortized to profit or loss over the period to maturity. The adjustment to the carrying amount of a hedged equity security remains in retained earnings until the disposal of the equity security.

(All amounts are shown in BGN thousands unless otherwise stated)

### Notes to the financial statements (continued)

#### H. Impairment of financial assets

##### (a) Assets carried at amortized cost

The Bank assesses at each balance sheet date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a "loss event") and that loss event has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

Objective evidence that a financial asset or group of assets is impaired includes observable data about the following loss events:

- Delinquency in contractual payments of principal or interest;
- Cash flow difficulties experienced by the borrower (for example, equity ratio, net income percentage of sales);
- Breach of loan covenants or conditions;
- Initiation of bankruptcy proceedings;
- Deterioration of the borrower's competitive position;
- Deterioration in the value of collateral and
- Downgrading below investment grade level.

The Bank first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the Bank determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

The amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the income statement. If a loan or held-to-maturity investment has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract. As a practical expedient, the Bank may measure impairment on the basis of an instrument's fair value using an observable market price.

The calculation of the present value of the estimated future cash flows of a collateralized financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics (i.e., on the basis of the Bank's grading process that considers asset type, industry, geographical location, collateral type, past-due status and other relevant factors). Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated.

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)**

**H. Impairment of financial assets (continued)**

**(a) Assets carried at amortized cost (continued)**

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the assets in the Bank and historical loss experience for assets with credit risk characteristics similar to those in the Bank. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not currently exist.

Estimates of changes in future cash flows for groups of assets should reflect and be directionally consistent with changes in related observable data from period to period (for example, changes in unemployment rates, property prices, payment status, or other factors indicative of changes in the probability of losses in the Bank and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly by the Bank to reduce any differences between loss estimates and actual loss experience.

When a loan is uncollectible, it is written off against the related provision for loan impairment. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognised in the income statement in impairment charge for credit losses.

The loan loss identification period is between three and twelve months.

**(b) Assets classified as available for sale**

The Bank assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity investments classified as available-for-sale, a significant or prolonged decline in the fair value of the financial asset below its cost is considered in determining whether the assets are impaired.

If any such evidence exists for available for-sale-financial assets, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in profit or loss – is removed from equity and recognized in the income statement. Impairment losses recognized in the income statement on equity instruments, classified as available-for-sale, are not reversed through the income statement. If, in a subsequent period, the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, the impairment loss is reversed through the income statement.

(All amounts are shown in BGN thousands unless otherwise stated)

### Notes to the financial statements (continued)

#### I. Property and equipment

The Bank recognizes the cost of an item of property, plant and equipment as an asset if it is probable that future economic benefits associated with the item will flow to the Bank and the cost of the item can be measured reliably. The cost of the property, plant and equipment comprises purchase price, including import duties and non-refundable purchase taxes and any cost directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. The cost is the cash price equivalent at the recognition date. The fair value of land and buildings is determined from market-based evidence by appraisal that is undertaken by professionally qualified valuers.

After initial recognition the Bank measures the land and building at fair value. The last revaluation of land and buildings has been performed by a qualified independent valuer at the end of 2008. The main valuation methods used to determine the fair value were:

- market prices analogs (where assets are compared to those similar of nature offered on the market)

- present value of future income for rent generating assets (DCF)

- method of reduced cost (taking into account the price that the asset would cost at present if acquired or built and reduced on the basis of economic and physical depreciation factors).

The accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset. The fair value of plant and equipment is their market value determined by appraisal. The Bank recognizes the increase as a result of revaluation of property, plant and equipment in equity as revaluation surplus. The Bank recognizes the increase as a result of revaluation of property, plant and equipment in profit or loss to the extent that it reverses a revaluation decrease of the same asset previously recognized in profit or loss. The Bank recognizes the decrease as a result of revaluation of property, plant and equipment in profit or loss. The Bank recognizes the decrease directly in equity to the extent of revaluation surplus previously accrued in respect of that asset.

The Bank includes the subsequent costs in the asset's carrying amount or recognizes as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Bank and the cost of the item can be measured reliably.

All other repairs, maintenance and renewals are charged to the income statement during the financial period in which they are incurred.

The carrying amount of an item of property and equipment is derecognized:

- (a) on disposal
- (b) when no future economic benefits are expected from its use or disposal.

The gain or loss from the derecognition of an item of property, plant and equipment is included in profit or loss when the item is derecognized. The Bank does not classify the gains as revenue. The gain or loss from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds and the carrying amount of the asset. Land is not depreciated. Depreciation on other assets is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

- Buildings -25 years
- Leasehold improvements - the life of the lease, or useful life if shorter
- Computer hardware and software- 4-10 years
- Other furniture and equipment - 4-20 years
- Motor vehicles- 5 years.

(All amounts are shown in BGN thousands unless otherwise stated)

#### **Notes to the financial statements (continued)**

##### **I. Property and equipment (continued)**

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date. In 2008 the Bank revised the useful life of some hardware and software. This revision is based on the fact that some systems which primarily support strategic banking functions cannot be replaced immediately, but instead their functionality is gradually expanded and upgraded without altering the initial system structure. Assets that are subject to depreciation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use.

##### **J. Intangible assets**

Costs that are directly associated with identifiable non-monetary asset without physical substance controlled by the Bank and which will probably generate economic benefits exceeding costs beyond one year, are recognized as intangible assets. Expenditure which enhances or extends the performance of intangible assets beyond their original specifications is recognized as a capital improvement and added to the original costs of the asset.

Costs associated with maintaining intangible assets are recognized as an expense as incurred.

Intangible assets are amortized using the straight-line method over their useful lives.

Intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An intangible asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

##### **K. Borrowings, including debt securities in issue**

Borrowings are recognized initially at fair value, being their issue proceeds (fair value of consideration received) net of transaction costs incurred. Borrowings are subsequently stated at amortised cost and any difference between net proceeds and the redemption value is recognized in the income statement over the period of the borrowings using the effective interest method.

##### **L. Investment property**

Investment property is defined as property (land or a building – or part of a building – or both) held (by the owner or by the lessee under a finance lease) to earn rentals or for capital appreciation or both, rather than for: (a) use in the production of supply of goods or services or for administrative purposes; or (b) sale in the ordinary course of business.

Investment property is held for long-term rental yields and is not occupied by the bank. Investment property is carried at fair value, representing open market value determined annually by external valuers. Fair value is based on active market prices, adjusted, if necessary, for any difference in the nature, location or condition of the specific asset. If the information is not available, the bank uses alternative valuation methods such as recent prices on less active markets or discounted cash flow projections. Changes in fair values are recorded in the income statement as part of other income.

(All amounts are shown in BGN thousands unless otherwise stated)

#### Notes to the financial statements (continued)

##### M. Cash and cash equivalents

For the purposes of the statement of cash flows, cash and cash equivalents comprise balances with less than 90 days to maturity from the date of acquisition including: cash and non-restricted balances with central banks, amounts due from other banks and short-term government securities. Investments are treated or qualify as cash equivalents only when they have a short maturity of 90 days or less from the date of acquisition.

##### N. Operating leases

Payments made under operating leases are charged against income in equal installments over the period of the lease.

##### O. Current tax and deferred income tax

Taxation has been provided for in the financial statements in accordance with Bulgarian legislation currently in force. The charge for taxation in the income statement for the year comprises current tax and changes in deferred tax. Current tax is calculated on the basis of the taxable profit for the year, using the tax rates enacted at the balance sheet date. Income tax payable on profits, based on the applicable tax law is recognized as an expense in the period in which profits arise. Taxes other than on income are recorded within operating expenses.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled. The principal temporary differences arise from depreciation of property, plant and equipment, revaluation reserve of financial instruments, provisions for court cases, the difference on balance sheet provision expenses according to the local and IFRS requirements and provisions for untaken annual leaves.

Deferred tax assets are recognized where it is probable that future taxable profit will be available against which the temporary differences can be utilized.

##### P. Employee benefits

###### (a) Social, pension and health funds

The Bank is obliged by the current Bulgarian legislation to make fixed contribution on behalf of the employees to a social fund operated by the Government. All those payments/liabilities are recognized as an expense in the period to which those relate.

###### (b) Retirement benefit obligations

In accordance with article 222, Para. 3 of the Bulgarian Labour Code, in the event of termination of a labour contract after the employee has reached the lawfully required retirement age, regardless of the reason for the termination, the employee is entitled to compensation as follows: 2 gross monthly salaries in all cases and 6 gross monthly salaries if the employee has been engaged with the Bank for at least 10 years.

At the end of every reporting period the Bank estimates and recognizes provisions for its retirement benefit obligations. In calculating the provision the Bank estimates the present value of its future retirement benefit obligations considering future salary increases and the probability of the employees retiring while employed in the Bank.

(All amounts are shown in BGN thousands unless otherwise stated)

#### **Notes to the financial statements (continued)**

##### **Q. Provisions**

Provisions for restructuring costs and legal claims are recognised when: the bank has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Restructuring provisions comprise lease termination of rent and other contracts, consultancy and audit fees, employees' payments. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation.

##### **R. Dividends**

Dividends are recognised as a liability when authorized by the General Assembly of the Shareholders. Subsequently they are deducted from equity when distributed.

Dividends will not be declared according to the long-term strategy of the Bank.

##### **S. Offsetting**

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to set off the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

##### **T. Financial guarantee contracts**

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due, in accordance with the terms of a debt instrument. Such financial guarantees are given to banks, financial institutions and other bodies on behalf of customers to secure loans, overdrafts and other banking facilities.

Financial guarantees are initially recognised in the financial statements at fair value on the date the guarantee was given. Subsequent to initial recognition, the bank's liabilities under such guarantees are measured at the higher of the initial measurement, less amortization calculated to recognize in the income statement the fee income earned on a straight line basis over the life of the guarantee and the best estimate of the expenditure required to settle any financial obligation arising at the balance sheet date. These estimates are determined based on experience of similar transactions and history of past losses, supplemented by the judgment of Management.

Any increase in the liability relating to guarantees is taken to the income statement under other operating expenses.

##### **U. Comparatives**

The Bank has not performed any reclassifications on balance sheet and income statement positions for 2008.

(All amounts are shown in BGN thousands unless otherwise stated)

### Notes to the financial statements (continued)

#### V. Financial risk management

The Bank's activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the financial business, and the operational risks are an inevitable consequence of being in business. The Bank's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Bank's financial performance.

The Bank's risk management policies are designed to identify and analyze these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Bank regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

Risk management policy of the Bank is formulated by the Risk Committee and the Risk Manager. The practice of the Parent Company, as well as international best practice is followed through well-defined internal processes and functions, as well as independent reviews.

The risk management policy reflects the Bank's objectives. It is therefore not intended that large risk positions are maintained solely to increase short-term profitability. The objective is to achieve a leading position on the Bulgarian market and to provide customers and counterparties of the Bank with a first class service, and in the same time to increase the profit for the shareholders, through minimizing undertaken risks and effectively controlling the Bank's expansion.

The adequacy of internal control systems is evaluated by Internal Audit functions, and by the External Auditors. Risk functions are managed by the Bank's Risk Management Division. The Bank's aim is to ensure independence and compliance through different levels of audit by its Internal Auditors, the EFG Group's Internal Auditors, the EFG Group's and the Bank's External Auditors and by regulatory authorities both in Bulgaria, Greece and Switzerland.

The four general areas of risk monitoring by the Bank are credit risk, market risk, operational risk and liquidity risk. The activity of Risk division and all risk related policies and procedures are in the process of full alignment with EFG Group risk guidelines and are controlled and guided by the Risk unit of the Parent-company. The Risk Manager of the Bank, heading Risk Division has a direct reporting line to the Risk Executive of the Parent company and a dotted reporting line to the CEO of the Bank. The Board of Directors of the Bank has delegated to the Risk Committee the role of approving all strategic risk management decisions. The Risk Committee is in charge of monitoring the quantitative and qualitative aspects of all credit, market, liquidity and operational risks. In addition, internal audit is responsible for the independent review of risk management and the control environment.

The ongoing global liquidity crisis which commenced in the middle of 2007 has resulted in a lower level of capital market funding, lower liquidity levels across the banking sector, and higher inter-bank lending rates and very high volatility in stock markets. The uncertainties in the global financial markets reflect the banks and companies in Bulgaria since 2008.

Management is unable to reliably estimate the effects on the Bank's financial position of any further deterioration in the liquidity of the financial markets and the increased volatility in the currency and equity markets. Management believes it is taking all the necessary measures to support the sustainability and growth of the Bank's business in the current circumstances.

(All amounts are shown in BGN thousands unless otherwise stated)

### Notes to the financial statements (continued)

#### V. Financial risk management (continued)

The borrowers of the Bank may be affected by the lower liquidity situation which could in turn impact their ability to repay the amounts owed. Deteriorating operating conditions for borrowers may also have an impact on management's cash flow forecasts and assessment of the impairment of financial assets. To the extent that information is available, management have properly reflected revised estimates of expected future cash flows in their impairment assessments.

The amount of provision for impaired loans is based on management's appraisals of these assets at the balance sheet date after taking into consideration the cash flows that may result from foreclosure less costs for obtaining and selling the collateral.

#### 1. Credit risk

The Bank takes on exposure to credit risk, which is the risk that counterparty will cause a financial loss for the Bank by failing to discharge an obligation. Credit risk is the most important risk for the Bank's business; management therefore carefully manages its exposure to credit risk. Credit exposures arise principally in lending activities that lead to loans and advances, and investment activities that bring debt securities and other bills into the Bank's asset portfolio. There is also credit risk in off-balance sheet financial instruments, such as loan commitments.

To address credit risk the Bank has established a complex organization structure allocating responsibilities for sales, administration, approval and control of credit activities to various specialist divisions and committees. Credit operations are governed by a comprehensive set of policies and procedures to ensure that all aspects of credit risk are adequately covered.

##### 1.1 Credit risk measurement

###### (a) Loans and advances

In measuring credit risk of loan and advances to customers and to banks at a counterparty level, the Bank reflects three components:

- (a) 'probability of default' by the client or counterparty on its contractual obligations;
- (b) current exposures to the counterparty and its likely future development, from which the Bank derives the 'exposure at default' and
- (c) likely recovery ratio on the defaulted obligations (the 'loss given default').

The Bank manages the credit risk of loans and advances to customers and to banks through a comprehensive set of policies and procedures to ensure that all aspects of credit risk are adequately covered.

The Bank uses a credit rating system according to which wholesale borrowers are assigned to a risk category: satisfactory credit performance, potentially problematic entities, watch listed and loss making cases that are fully provided for. The criteria used to assess the credit rate include:

- Financial data for the client, the sector and the market;
- Information on the client's management;
- The clients past credit history either with the Bank or with other banks;
- Existence of detrimental information;
- Type and size of collateral offered;
- History of changes in ownership and
- History of changes in assets.

(All amounts are shown in BGN thousands unless otherwise stated)

#### Notes to the financial statements (continued)

#### V. Financial risk management (continued)

#### 1. Credit risk (continued)

#### 1.1. Credit risk measurement (continued)

The Bank assesses the credit quality of the wholesale loans on a case-by-case basis using standard grading system and based on a profound analysis of a set of qualitative and quantitative factors.

The wholesale loans are rated in 11 categories. The bank groups the wholesale loans categorized from 1 to 6 category in the grade satisfactory risk and these categorized with 7 category in the grade watch list. The Bank presents the wholesale loans in the category from 8 to 11 as individually impaired loans.

Qualitative factors are those that deal with the borrower's management, industry, operating conditions, the market sector in which the borrower operates, securities, loan servicing etc. Quantitative factors are those that refer to a set of ratios (main ratios: profitability, leverage, liquidity) emerging from the borrower's financial statements (balance sheet, income statement, notes to the financial statements etc.)

The classification of retail clients is based on the full delinquency analysis by groups. The grouping is based on the common characteristics of the respective products, the similar risks they bear and the type of collateral that secures them. In case that a borrower is client to more than one of the above mentioned groups, the classification of each single retail loan of one and the same retail client should be done independently from the other loans of the same customer.

#### (b) Debt securities

For debt securities, external rating such as Standard & Poor's, Moody's and Fitch rating are used by the Bank for managing of the credit risk exposures. The investments in those securities are viewed as a way to gain a better credit quality mapping and maintain a readily available source to meet the funding requirement at the same time.

#### 1.2 Risk limit control and mitigation policies

The Bank manages limits and controls concentrations of credit risk wherever they are identified in particular, to individual counterparties and groups, and to industries.

The Bank structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to geographical and industry segments. Such risks are monitored on a revolving basis and are subject to an annual or more frequent review. The exposure to any one borrower including banks and brokers is further restricted by sub limits covering on- and off-balance sheet exposures, and daily delivery risk limits in relation to trading items such as forward foreign exchange contracts. Actual exposures against limits are monitored on a daily basis.

The exposure to anyone borrower is restricted by limits covering on- or off- balance sheet. Off-balance sheet facilities to customers include foreign exchange transactions, letters of credit, letters of guarantee, reverse repos and other financial instruments. The credit equivalent amounts for off-balance sheet facilities are determined in accordance with Bulgarian National Bank, EFG Group and Market Risk Unit guidelines. Overall customer exposure arising from all transactions and facilities is aggregated for monitoring utilization of the credit facility limit.

The Bank is active in the corporate and retail lending markets. Credit risk is well spread over a diversity of personal and commercial customers. Exposure to credit risk is managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing the lending limits where appropriate

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)**

**V. Financial risk management (continued)**

**1. Credit risk (continued)**

**1.2 Risk limit control and mitigation policies (continued)**

Some other specific control and mitigation measures are outlined below

**(a) Collateral**

The Bank employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security for funds advances, which is common practice. The principal collateral types for loans and advances are:

- Mortgages over residential properties;
- Charges over business assets such as premises, inventory and accounts receivable;
- Charges over financial instruments such as debt securities and equities and
- Issued guarantees.

Longer-term finance and lending to corporate entities are generally secured. In order to minimize the credit loss the Bank will seek additional collateral from the counterparty as soon as impairment indicators are noticed for the relevant individual loans and advances.

Collateral held as security for financial assets other than loans and advances is determined by the nature of the instrument. Debt securities are generally unsecured, with the exception of asset-backed securities and similar instruments, which are secured by portfolios of financial instruments.

**(b) Derivatives**

The Bank maintains strict control limits on net open derivative positions (i.e. the difference between purchase and sale contracts), by both amount and term. At any one time, the amount subject to credit risk is limited to the current fair value of instruments that are favourable to the Bank (i.e., assets where their fair value is positive), which in relation to derivatives is only a small fraction of the contract, or notional values used to express the volume of instruments outstanding. This credit risk exposure is managed as part of the overall lending limits with customers, together with potential exposures from market movements. Collateral or other security is not usually obtained for credit risk exposures on these instruments. Further details of the 'Group's derivative instruments are provided in note 20.

Settlement risk arises in any situation where a payment in cash, securities or equities is made in the expectation of a corresponding receipt in cash, securities or equities.

**(c) Credit related commitments**

Guarantees and standby letters of credit, which represent irrevocable assurance that the Bank will make the payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as loans. Documentary and commercial letters of credit, which are written undertakings by the Bank on behalf of a customer authorizing a third party to draw drafts on the Bank up to a stipulated amount under specific terms and conditions, are collateralized with cash deposits or other collateral pledged to the Bank, and accordingly the Bank normally assumes minimal risk.

Commitments to extend credit represent unused portions of authorizations to extend credit in the form of the loan. With respect to credit risk on commitments to extend credit, the Bank is potentially exposed to loss in an amount equal to the total unused commitments. The Bank monitors the term to maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)****V. Financial risk management (continued)****1. Credit risk (continued)****1.3. Maximum exposure to credit risk before collateral held or other credit enhancements**

The table below represents worst case scenario of credit risk exposure to the Bank as at 31 December 2009 without taking account of any collateral held or other credit enhancements attached. For on-balance-sheet assets, the exposures set out below are based on net carrying amounts as reported in the balance sheet.

As shown below 91% of the total maximum exposure is derived from loans and advances to banks and customers (2008: 90%); 8% represents investments in debt securities (2008: 9%)

**Maximum exposure**

	<b>2009</b>	<b>31 December 2008</b>
Credit risk exposures relating to on-balance sheet assets are as follows:		
Loans and advances to banks	587,730	633,485
Loans and advances to customers:		
- Mortgages	890,353	529,760
- Consumer lending (including credit cards)	957,483	610,414
- Small Business lending	866,903	847,158
- Corporate lending	1,561,304	1,729,060
Trading assets - debt securities	15,527	19,713
Derivative financial instruments	16,304	46,649
Investment securities- available-for-sale-debt securities	429,715	418,834
Investment securities, held-to-maturity	-	1,365
Other assets	10,646	14,037
Credit risk exposures relating to off-balance sheet items are as follows:		
Financial guarantees	119,102	176,182
Letters of credit	10,210	25,304
Loan commitments and other credit related liabilities	510,132	704,608
<b>Total</b>	<b>5,975,409</b>	<b>5,756,569</b>

**1.4 Loans and advances**

Loans and advances are summarized as follows:

<b>Balance at 31 December 2009</b>	<b>Loans and advances to customers</b>
Neither past due nor impaired	3,531,417
Past due but not impaired	522,922
Impaired	390,517
<b>Gross</b>	<b>4,444,856</b>
Less: allowance for impairment	(168,813)
<b>Net</b>	<b>4,276,043</b>

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)**

**V. Financial risk management (continued)**

**1. Credit risk (continued)**

**1.4. Loans and advances (continued)**

<b>Balance at 31 December 2008</b>	<b>Loans and advances to customers</b>
Neither past due nor impaired	3,164,694
Past due but not impaired	515,263
Impaired	94,983
<b>Gross</b>	<b>3,774,940</b>
Less: allowance for impairment	(58,548)
<b>Net</b>	<b>3,716,392</b>

The total impairment provision for loans and advances is BGN 168,813 thousand (2008: BGN 58,548 thousand) of which BGN 56,058 thousand represents the individually impaired loans and the remaining amount of BGN 112,755 thousand represents the portfolio provision. Further information of the impairment allowance for loans and advances to banks and to customers is provided in Note 12.

During the year ended 31 December 2009, the Bank's total loans and advances increased by 18%. In order to minimize the potential increase of credit risk exposure, the Bank has focused more on the business with large corporate enterprises with good credit rating or retail customers providing sufficient collateral.

*(a) Loans and advances neither past due nor impaired*

The credit quality of the portfolio of loans and advances that were neither past due nor impaired at 31 December 2009 can be assessed by reference to the internal standard grading system (see 1.1. a). The following information is based on that system:

<b>Balance at 31 December 2009</b>	<b>Loans and advances to customers</b>
Satisfactory risk	3,531,417
<b>Balance at 31 December 2008</b>	<b>Loans and advances to customers</b>
Satisfactory risk	3,164,694

(All amounts are shown in BGN thousands unless otherwise stated)

## Notes to the financial statements (continued)

## V. Financial risk management (continued)

## 1. Credit risk (continued)

## 1.4. Loans and advances (continued)

*(b) Loans past due but not impaired*

31 December 2009	Consumer lending	Mortgages	Small Business Lending	Corporate Lending	Total
Past due up to 29 days	90,004	38,026	36,927	144,200	309,157
Past due 30 - 89 days	70,510	23,924	34,173	38,392	166,999
Past due 90 days - 179 days	-	12,728	-	34,038	46,766
<b>Total</b>	<b>160,514</b>	<b>74,678</b>	<b>71,100</b>	<b>216,630</b>	<b>522,922</b>
Fair value of collateral	956	80,587	62,440	151,186	295,169
31 December 2008	Consumer lending	Mortgages	Small Business Lending	Corporate Lending	Total
Past due up to 29 days	62,647	54,720	38,270	145,687	301,324
Past due 30 - 89 days	28,011	20,332	31,025	65,487	144,855
Past due 90 days - 179 days	-	9,430	-	59,654	69,084
<b>Total</b>	<b>90,658</b>	<b>84,482</b>	<b>69,295</b>	<b>270,828</b>	<b>515,263</b>
Fair value of collateral	1,070	83,949	58,105	144,153	287,277

*(c) Impaired Loans and advances collectively assessed*

For collectively assessed accounts, loans are treated as impaired based on historical loss data for groups of loans with similar characteristics. The criteria used by the Bank to determine that there is objective evidence of impairment are provided in point 1.1. Not all loans collectively assessed for impairment are considered impaired. Based on past experience, consumer loans less than 90 days past due and mortgage loans less than 180 days past due are not considered impaired, unless specific information indicates to the contrary. Consumer loans over 90 days past due and mortgage loans over 180 days past due are considered as impaired loans collectively assessed.

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)****V. Financial risk management (continued)****1. Credit risk (continued)****1.4. Loans and advances (continued)**

<b>31 December 2009</b>	<b>Consumer lending</b>	<b>Mortgages</b>	<b>Total</b>
Collectively assessed for impairment	110,267	28,174	138,441
Fair value of collateral	772	26,992	27,763
<b>31 December 2008</b>	<b>Consumer lending</b>	<b>Mortgages</b>	<b>Total</b>
Collectively assessed for impairment	19,165	8,956	28,121
Fair value of collateral	500	8,706	9,206

Classification of retail clients is based on the full delinquency analysis by groups. The grouping is based on common characteristics of the respective products, similar risks they bear and the type of collateral that secures them.

*(d) Loans and advances individually impaired*

For individually assessed accounts, loans are treated as impaired as soon as there is objective evidence that an impairment loss has been incurred. The criteria used by the Bank to determine that there is objective evidence of impairment include:

- known cash flow difficulties experienced by the borrower
- overdue contractual payments of either principal or interest
- breach of loan covenants or conditions;
- the probability that the borrower will enter bankruptcy or other financial reorganization; and
- a downgrading in credit rating by an external credit rating agency

Further information on impaired loans is provided below in "Impairment assessment".

The criteria used by the Bank to determine that there is objective evidence of impairment are provided in point 1.1 .

<b>31 December 2009</b>	<b>Small Business Lending</b>	<b>Corporate Lending</b>	<b>Total</b>
Individually impaired loans	85,531	166,545	252,076
Fair value of collateral	70,902	147,773	218,675
<b>31 December 2008</b>	<b>Small Business Lending</b>	<b>Corporate Lending</b>	<b>Total</b>
Individually impaired loans	32,219	34,643	66,862
Fair value of collateral	24,184	28,753	52,937

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)**

**V. Financial risk management (continued)**

**1. Credit risk (continued)**

**1.4. Loans and advances (continued)**

Wholesale borrowers are rated on a case-by-case basis following the Internal Credit Rating System. The credit rating is based on a profound analysis of qualitative and quantitative factors. Qualitative factors are those that deal with the borrower's management, industry, operating conditions, the market sector in which the borrower operates, securities, loan servicing etc. Quantitative factors are those that refer to a set of ratios (main ratios: profitability, leverage, liquidity) emerging from the borrower's financial statements (balance sheet, income statement, notes to the financial statements etc.)

Small business lending loans over 90 days overdue are assessed on a case by case basis, following the bank's provisioning policy.

The disclosed fair value of collateral is determined by local certified valuers and represents value realizable by the legal owners of the assets. The impairment provisions reflect the probability that management will not be able to enforce its rights and repossess collateral on defaulted loans. Despite difficulties in enforcing repossession of collateral, the Bank's management will vigorously pursue the outstanding debts with all possible means at their disposal

*(e) Loans and advances renegotiated*

Restructuring activities include extended payment arrangements, approved external management plans, modification and deferral of payments. Following restructuring, a previously overdue customer account is reset to a normal status and managed together with other similar accounts. Restructuring policies and practices are based on indicators or criteria which, in the judgment of the management, indicate that the payment will most likely continue. These policies are kept under continuous review. Loans that have been renegotiated are considered by the Bank as cured if they fully perform over probation period following the renegotiation. Within the probation period the renegotiated loans are closely monitored by the Management and are presented as past due but not impaired or impaired ones. In this regard as of end of December 2009 the respective amount of renegotiated loans that would otherwise be past due or impaired is BGN 17,310 thousands (2008: BGN 4,943 thousands).

	<b>2009</b>	<b>2008</b>
Loans and advances to customers :		
– Small business lending	8,139	-
– Mortgages lending	6,522	68
– Consumer lending	2,649	-
– Corporate lending	-	4,875
<b>Total</b>	<b>17,310</b>	<b>4,943</b>

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)****V. Financial risk management (continued)****1. Credit risk (continued)****1.5. Debt securities**

The table below presents an analysis of debt securities by rating agency designation, based on the credit assessments of nominated External Credit Assessment Institutions. In the table below is shown Standard and Poor's ratings or their equivalent:

**31 December 2009**

Rating	Trading securities	Investment securities, available for sale	Investment securities, held to maturity	Total
AAA	-	2,035	-	2,035
AA- to AA+	-	2,851	-	2,851
A- to A+	8,845	-	-	8,845
Lower than A-	1,827	358,493	-	360,320
Unrated	4,855	66,336	-	71,191
<b>Total</b>	<b>15,527</b>	<b>429,715</b>	<b>-</b>	<b>445,242</b>

**31 December 2008**

Rating	Trading securities	Investment securities, available for sale	Investment securities, held to maturity	Total
AAA	-	1,717	-	1,717
AA- to AA+	4,830	2,308	-	7,138
A- to A+	-	-	-	-
Lower than A-	14,883	329,724	1,365	345,972
Unrated	-	85,085	-	85,085
<b>Total</b>	<b>19,713</b>	<b>418,834</b>	<b>1,365</b>	<b>439,912</b>

The unrated debt securities represent bonds of local companies. The investments in those securities are viewed as a way to gain a better credit quality mapping based on the internal rating system and maintain a readily available source to meet the funding requirement at the same time.

**1.6. Repossessed collateral**

Repossessed properties are sold as soon as practicable, with the proceeds used to reduce the outstanding indebtedness. Repossessed property is classified in the balance sheet within other assets.

The balances of the repossessed collaterals as at year-end are as follows

Nature of assets	2009	2008
Commercial property	480	315
Equipment	237	237
Residential property	1,537	1,176
Land	105	52
<b>Total</b>	<b>2,359</b>	<b>1,780</b>

(All amounts are shown in BGN thousands unless otherwise stated)

(All amounts are shown in BGN thousands unless otherwise stated)

## Notes to the financial statements (continued)

### V. Financial risk management (continued)

#### 2. Market risk

The Bank takes on exposure to market risks, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates, credit spreads, foreign exchange rates and equity prices.

The factors that generate market risk are the interest rate risk, foreign exchange risk and the equity price risk.

The interest rate risk is the risk of potential loss from adverse changes in interest rates. These include reprising risk, yield curve risk, basis risk, spread risk, volatility risk.

The foreign exchange risk is the risk of potential loss from adverse changes in foreign currency exchange rates, against the base currency. It includes outright risk, volatility risk and conversion risk.

The equity price risk is the risk of potential loss from adverse changes in equity prices. It includes outright risk, volatility risk, spread risk, dividend risk and other risks.

The Bank's Market Risk Policy is maintained by Risk Division and approved by the Board of Directors of the Bank. The Market Risk policy is reviewed at least annually and submits changes to the Board. The Market Risk Policy applies to the control of market risk arising on all Bank's assets, liabilities and off-balance sheet positions; it therefore covers Treasury and non-Treasury activities that are subject to market risk. The Market Risk Policy is in compliance with the Parent company Risk Guidelines, which pertain to market risk.

The objectives of market risk control and supervision are to:

- Protect the bank against unforeseen market losses;
- Contribute to more stable and predictable earnings and
- Develop transparent, objective and consistent market risk information as the basis for sound decision making.

Market risk threshold is the size of the potential unexpected loss that the Bank is willing to absorb because of adverse changes in market variables. The market risk threshold must not exceed the Bank's ability to absorb those losses, with a certain degree of confidence. The ability to absorb losses arising from the market risks depends on:

- The Bank's total capital and reserves and
- Potential losses arising from other, non-market risks.

The Bank's market risk threshold is determined by the Risk Committee. It is expressed both in terms of quantity (limits) and quality (characteristics). The Bank uses a system of limits introduced by Parent company which monitors the Bank's aggregate exposure to market risks.

The Bank's market risk threshold is also expressed through characteristics such as different types of allowed markets, products, countries, counterparties and currencies.

#### 2.1 Market risk measurement techniques

The Bank has to include all positions that are exposed to market risk in the measurement system.

The risk factors that generate market risk and have to be included in the market risk measurement system consist of, but are not limited to:

- Foreign Exchange rates
- Interest Rates and
- Equity prices

(All amounts are shown in BGN thousands unless otherwise stated)

## Notes to the financial statements (continued)

### V. Financial risk management (continued)

#### 2. Market risk (continued)

##### 2.1 Market risk measurement techniques

Currently market risk measurement is done using notional exposure data and notional level limits.

Upon senior management decision, in the future the Bank may introduce value – at- risk analysis (the maximum amount that the portfolio is expected to lose over a specified period with a given probability) in order to quantify the expected maximum loss that can affect the Income statement.

Upon introduction of VAR the following have to be carried out:

1. Document the assumptions and methodologies used for market risk measurement and periodically assess and check their validity and accuracy;
2. Measure the Income statement impact of breakdown of one or more of the underlying assumptions (that is a “stress test”).

##### 2.2 Foreign exchange risk

The Bank takes on exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. The Management sets limits on the level of exposure by currency and in aggregate for both overnight and intra-day positions, which are monitored daily.

##### 2.3 Sensitivity of assets and liabilities

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates.

The Bank takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. Interest margins may increase as a result of such changes but may reduce or create losses in the event that unexpected movements arise. The Management reviews the level of mismatch of interest rate and the necessary reprising that may be undertaken on a monthly basis.

The Bank is exposed to the fluctuations of the different types of market risk. The sensitivity analysis below illustrates the potential impact on the income statement and equity for “reasonable possible shifts”. In the table below, the Bank is presenting reasonable possible shifts, chosen based on the market and economic environments that have been observed during the reporting period.

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)**

**V. Financial risk management (continued)**

**2. Market risk (continued)**

**2.3 Sensitivity of assets and liabilities (continued)**

Sensitivity to changes to the three major market risk factors – foreign exchange, interest rate and equity price risk, has been calculated and presented in the above table. The calculation parameters used have been determined based on the market environment and the dynamics during 2008 and 2009 and represent reasonable possible shifts in the market variables.

1. Foreign exchange risk sensitivity has been calculated directly on the total net open position of the Bank as 25% depreciation / 20% appreciation of the local currency against all foreign currencies.

2. Interest rate risk sensitivity has been estimated by applying a parallel yield curve shift to all of the Bank's relevant on- and off-balance sheet positions and calculating the changes in their present value. The results have been allocated to three columns depending on the accounting treatment of each position:

- Direct P&L effect - for items with revaluation reflected in the P&L (trading portfolio securities and derivatives);
- Direct equity effect - for items with revaluation that affects the equity reserves (AFS securities);
- Banking book effect - for items with no accounting revaluation, the effect is through changes in the economic value of capital.

The sum of the three columns gives the total effect on the economic value of the Bank.

The following parallel yield curve shifts have been applied:

For BGN +250 bps / -250 bps;

For EUR +200 bps / -50 bps;

For USD & CHF +200 bps / -25 bps.

3. Equity price risk. Equity price risk sensitivity has been calculated by applying a 25% drop / 25% increase in equity prices across the board.

**2.4 Fair values of financial assets and liabilities**

Fair value is the amount at which a financial instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation and is best evidenced by a quoted market price. The estimated fair values of financial instruments have been determined by the Bank using available market information, where it exists, and appropriate valuation methodologies.

(All amounts are shown in BGN thousands unless otherwise stated)

## Notes to the financial statements (continued)

## V. Financial risk management (continued)

## 2. Market risk (continued)

## 2.4 Fair values of financial assets and liabilities (continued)

The following table summarizes the carrying amounts and fair values of financial assets and liabilities of the Bank. Market prices are used to estimate fair values of assets and liabilities.

	Carrying value		Fair value	
	2009	2008	2009	2008
<b>Financial assets</b>				
Loans and advances to banks	587,730	633,485	587,730	633,485
Loans and advances to customers, including:				
-Mortgage loans	890,353	529,760	890,353	529,760
-Consumer loans, including credit cards	957,483	610,414	957,483	610,414
-Small business lending	866,903	847,158	866,903	847,158
-Corporate loans	1,561,304	1,729,060	1,561,304	1,729,060
<b>Total loans and advances to customers</b>	<b>4,276,043</b>	<b>3,716,392</b>	<b>4,276,043</b>	<b>3,716,392</b>
Investment securities, held –to-maturity	-	1,365	-	1,079
<b>Financial liabilities</b>				
Deposits from banks	372,042	279,645	372,042	279,645
Due to customers , including:				
– Retail customers	2,880,869	2,768,352	2,880,869	2,768,352
– Large corporate customers	1,346,766	945,207	1,346,766	945,207
– Medium corporate customers	105,034	134,684	105,034	134,684
<b>Total due to customers</b>	<b>4,332,669</b>	<b>3,848,243</b>	<b>4,332,669</b>	<b>3,848,243</b>
Debt issued and other borrowed funds	476,331	694,246	476,391	694,354

(All amounts are shown in BGN thousands unless otherwise stated)

Notes to the financial statements (continued)

V. Financial risk management (continued)

2. Market risk (continued)

2.4 Fair values of financial assets and liabilities (continued)

Off Balance Sheet Items	Notional amount		Fair value	
	2009	2008	2009	2008
Guarantees and Letters of credits				
- Corporate lending	124,400	192,979	2,263	2,370
- Small business and retail lending	4,912	8,507	151	193
Undrawn loan commitments				
- Corporate lending	134,095	410,212	-	-
- Small business and retail lending	376,037	294,396	-	-

a) *Due from other banks*

Due from other banks includes repurchase agreements, inter-bank placements and items in the course of collection. The funds are short term and the fair value approximates their carrying amount.

b) *Loans and advances to customers*

Loans and advances are carried at amortized cost and are net of provisions for impairment. The Bank has the contractual right to change interest rates on loans and advances contracts after a certain period from the origination date of the contract. For these contracts the Bank considered the date, when it is entitle to change interest rates, as a contractual reprising date. Therefore the fair value of loans and advances to customers approximates their carrying amount.

c) *Due to customers*

The Bank has the contractual right to change interest rates on deposits contracts after a certain period from the origination date of the contract. For these contracts the Bank considered the date, when it is entitle to change interest rates, as a contractual reprising date. Therefore the fair value of due to customers approximates their carrying amount.

d) *Other borrowed funds*

The fair value of corporate bonds issued by the Bank and the long term debts is estimated based on the interest rates as at the end of the year. Borrowed funds carry predominantly floating rates and due to the interest rate reprising carrying value is not materially different from their fair value.

e) *Guarantees and Letters of credits*

The Bank does not expect payments to be made regarding the guarantees and letters of credits. The undrawn loan commitments relate to the floating rate loans and therefore their fair value is nil.

(All amounts are shown in BGN thousands unless otherwise stated)

Notes to the financial statements (continued)

V. Financial risk management (continued)

2. Market risk (continued)

2.5 Financial instruments measured at fair value

All financial instruments that are measured at fair value are categorised into one of the three fair value hierarchy levels at year-end based on whether the inputs to their fair values are observable or non observable.

Level 1 - Quoted prices in active markets for identical assets or liabilities. Quoted prices must be readily and regularly available from an exchange or active index/market location and prices must represent actual and regularly occurring market transactions on an arm's length basis. This level includes listed equity securities, debt instruments and exchange traded derivatives.

Level 2 - Financial instruments measured using valuation techniques where all significant inputs are market observable. This level includes OTC derivative contracts and structured assets and liabilities.

Level 3 - Financial instruments measured using valuation techniques with significant non observable inputs.

As of 31 December 2009, the Bank did not have any level 3 financial assets or liabilities.

	31 December 2009			
	Level 1	Level 2	Level 3	Total
<b>Financial assets measured at fair value:</b>				
Financial assets held for trading				
-Debt securities	10,672	4,855	-	15,527
-Equity securities	1,274	-	-	1,274
-Derivatives	-	16,304	-	16,304
Available-for-sale investment securities				
-Investment securities - debt	363,546	-	-	363,546
-Investment securities - equity	2,768	-	-	2,768
<b>Total financial assets</b>	<b>378,260</b>	<b>21,159</b>	<b>-</b>	<b>399,419</b>
<b>Financial liabilities measured at fair value:</b>				
Derivative financial instruments	-	54,758	-	54,758
<b>Total financial liabilities</b>	<b>-</b>	<b>54,758</b>	<b>-</b>	<b>54,758</b>

The financial instruments that are held at amortised cost are excluded from the table above. The balance sheet amount is as follows:

Available-for-sale investment securities	Amortised cost
-Investment securities - debt	66,169
-Investment securities - equity	3,899

(All amounts are shown in BGN thousands unless otherwise stated)

#### Notes to the financial statements (continued)

### V. Financial risk management (continued)

#### 3. Liquidity risk

Liquidity risk is the risk that the Bank is unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn. The consequence may be the failure to meet obligations to replay depositors and fulfill commitments to lend.

##### 3.1. Liquidity risk management process

The Bank designates appropriate liquidity policies which have to ensure that:

- Sufficient liquid assets are maintained to meet liabilities as they arise;
- A prudent proportion of medium term assets are funded by medium term liabilities and
- The liquidity position is monitored closely on a daily basis and continuously throughout the dealing operations.

The Board of Directors of the Bank assigns the Assets and Liabilities Committee as the primary responsible body to advise the Board for the strategy for the liquidity management.

Assets and Liabilities Committee manages:

- The Bank's assets and liabilities to ensure regular and timely meeting of current and future obligations.
- The Bank's cash inflows and outflows /liquidity sources and uses/ and the ratios between assets and liabilities.
- The target liquidity ratios set by Parent company and
- The liquidity ratios recommended by the Regulator

The operational management of the Bank's Assets and Liabilities and the execution of Assets and Liabilities Committee decisions regarding Liquidity is assigned to the Head of Treasury.

##### 3.2 Funding approach

Sources of liquidity are regularly reviewed by Assets and Liabilities Committee to maintain a wide diversification by currency, geography, provider, product and term.

##### 3.3 Cash flows

The table below presents the cash flows receivables and payable by the Bank under financial assets/ liabilities by remaining contractual maturities at the balance sheet date. The amounts disclosed in the table are the contractual undiscounted cash flows calculated on spot rates.

(All amounts are shown in BGN thousands unless otherwise stated)

- Capital expenditure	373	-	-	373
Operating lease commitments	7,801	-	-	7,801

(All amounts are shown in BGN thousands unless otherwise stated)

#### Notes to the financial statements (continued)

#### V. Financial risk management (continued)

##### 4. Capital management

The Bank's Management objectives when managing capital, which is a broader concept than the 'equity' on the face of balance sheets, are:

- to comply with the capital requirements set by the regulators of the banking markets where the Bank operates;
- To safeguard the Bank's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- To maintain a strong capital base to support the development of its business.

Capital adequacy and the use of regulatory capital are monitored by the Bank's management, employing techniques based on the guidelines developed by the Basel Committee and the European Community Directives, as implemented by the Bulgarian National Bank (Authority), for supervisory purposes. The required information is filed with the Authority on a quarterly basis.

The Authority requires each bank or banking group to: (a) hold the minimum level of the regulatory capital of BGN 10 000 thousand and (b) maintain a ratio of total regulatory capital to the risk-weighted asset of 12%.

Regulatory capital consists of Tier I capital, which includes shareholders' ordinary equity, „Reserve” fund, retained earnings from previous year. Deductions of Tier I capital include intangible assets and unrealized loss from available for sale financial instruments. Tier II capital includes subordinated debt and revaluation reserves for the real estate, occupied by the Bank.

The following amounts are reduced at 50% from Tier I and 50% at Tier II capital: specific provisions under the Bulgarian National bank' Ordinance No. 9 on the evaluation and classification of risk exposures of banks and the allocation of provisions to cover credit risk and investments in shares amounting to more than 10% of the paid in capital of credit or financial institutions.

Tier-two capital cannot exceed 50% of tier-one capital.

The risk-weighted assets are measured by means of a hierarchy of five risk weights classified according to the nature of – and reflecting an estimate of credit, market and other risks associated with – each asset and counterparty, taking into account any eligible collateral or guarantees. A similar treatment is adopted for off-balance sheet exposure, with some adjustments to reflect the more contingent nature of the potential losses.

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)**

**V. Financial risk management (continued)**

**4. Capital management (continued)**

The table below summarizes the composition of regulatory capital and the ratios of the Bank for the years ended 31 December. During those two years, the Bank complied with all of the externally imposed capital requirements to which they are subject.

	2009	2008
<b>Tier 1 capital</b>		
Share capital	452,753	246,178
General bank Reserves	-	-
Reserves	275,067	183,565
Audited current profit	-	42,092
Revaluation-reserve - available for sale investments	(11,115)	(56,048)
Less:		
Intangible assets	18,270	14,668
Specific Provisions under Reg.9	78,905	42,705
50% of the paid-in capital of a unconsolidated undertakings	-	125
<b>Total qualifying Tier 1 capital</b>	<b>619,530</b>	<b>358,289</b>
<b>Tier 2 capital</b>		
Long term debt	71,940	290,258
Revaluation reserve of property owned by the Bank	2,376	3,310
Less:		
Specific Provisions	74,316	42,705
50% of the paid-in capital of a unconsolidated undertakings	-	125
<b>Total qualifying Tier 2 capital</b>	<b>-</b>	<b>250,738</b>
<b>Risk-weighted assets</b>		
On-balance sheet	4,518,814	4,101,905
Off-balance sheet	185,662	323,146
<b>Total risk-weighted assets</b>	<b>4,704,476</b>	<b>4,425,051</b>
<b>Basel ratio</b>	<b>13.17%</b>	<b>13.76%</b>

The increase of the risk-weighted assets reflects the expansion of the business of the Bank.

(All amounts are shown in BGN thousands unless otherwise stated)

### Notes to the financial statements (continued)

#### W. Business segments

In the financial year 2009 segment analysis was prepared for the first time in accordance with IFRS 8, "Operating segments".

Segment information for 2008 that is presented as comparative information for 2009 has been reported to conform to the requirements of IFRS 8.

Following the management approach of IFRS 8, operating segments are reported in accordance with the internal reporting provided by the Executive Board (the chief operating decision-maker), which is responsible for allocating resources to the reportable segments and assesses its performance. All operating segments used by the Bank meet the definition of a reportable segment under IFRS 8.

The Bank has three main business segments, based on product and services as follows:

- Retail banking – incorporating customer current accounts, savings, deposits and investment savings products, credit and debit cards, consumer and car loans, small business and mortgage lending
- Corporate banking - incorporating direct debit facilities, current accounts, deposits, overdrafts, loan and other credit facilities, foreign currency and derivative products to corporate entities
- Capital Markets - incorporating investment banking services including corporate finance, custody, equity brokerage, financial instruments trading and institutional finance to corporate and institutional entities

Other operations of the Bank comprise mainly activities related to the management of unallocated capital and represent earnings on capital not used in the activities performed by business segments in the reporting year.

	31 December 2009				
	Capital Markets	Corporate	Retail	Other	Total

## X. Critical accounting estimates and judgments in applying accounting policy

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

*Impairment losses on loans and advances*

The Bank reviews its loan portfolio to assess impairment on a monthly basis. The impairment review is in compliance with the approved management policy for assessment of risk exposures. In determining whether an impairment loss should be recorded in the income statement, the Bank makes judgments as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with an individual loan in that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a group, or national or local economic conditions that correlate with defaults on assets in the group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

*Impairment of available-for-sale equity investments*

The Bank determines that available-for-sale equity investments are impaired when there has been a significant or prolonged decline in the fair value below its cost. This determination of what is significant or prolonged requires judgment. In making this judgment, the Bank evaluates among other factors, the normal volatility in share price. In addition, impairment may be appropriate when there is evidence of deterioration in the financial health of the investee, industry and sector performance, changes in technology, and operational and financing cash flows.

(All amounts are shown in BGN thousands unless otherwise stated)

### Notes to the financial statements (continued)

#### X. Critical accounting estimates and judgments in applying accounting policy

##### *Fair value of derivatives*

The fair values of financial instruments that are not quoted in active markets are determined by using valuation techniques. Where valuation techniques are used to determine fair values, they are validated and periodically reviewed by qualified personnel independent of the area that created them. All models are certified before they are used, and models are calibrated to ensure that outputs reflect actual data and comparative market prices. To the extent practical, models use only observable data. Therefore areas such as credit risk volatilities and correlations require management to make estimates. Changes in assumptions about these factors could affect reported fair value of financial instruments.

##### *Application of the effective interest rate method*

The application of the effective interest rate method for loan related fees requires the use of estimates about the expected life and other patterns and characteristics of the loan portfolio. In building up these estimates the bank utilizes the experience of other entities in EFG Eurobank Ergasias Group and Bulgarian market conditions. The bank has applied effective interest method regarding the loans related fees prospectively, because it cannot provide evidence of circumstances that existed on the dates as at which the transactions occurred in order to determine the cumulative effect on the comparative information.

##### *Sensitivity analysis of assets and liabilities*

The sensitivity analysis illustrates the potential impact on the income statement and equity for "reasonable possible shifts. Sensitivity to changes to the three major market risk factors – foreign exchange, interest rate and equity price risk, has been calculated. The parameters of calculations used have been determined based on the current market environment and the dynamics during 2009 and represent reasonable possible shifts in the market variables. The 2008 figures have been recalculated with the same parameters.

The Foreign exchange risk sensitivity has been calculated directly on the total net open position of the Bank as 25% depreciation / 20% appreciation of the local currency against all foreign currencies.

The Interest rate risk sensitivity has been estimated by applying a parallel yield curve shift to all of the Bank's relevant on- and off-balance sheet positions and calculating the changes in their present value.

The Equity price risk sensitivity has been calculated by applying a 25% drop / 25% increase in equity prices across the board.

##### *Fair value of land and buildings*

The Bank determines the fair value of land and building from market-based evidence by appraisal that is undertaken by professionally qualified valuers. The bank follows its accounting policy to revalue the land and building every five years. Based on the accounting policy of the Bank the revaluation of land and buildings has been performed by a qualified independent valuer at the end of 2008.

The main valuation methods used to determine the fair value were:

- market prices analogs (where assets are compared to those similar of nature offered on the market)
- present value of future income for rent generating assets (DCF)
- method of reduced cost (taking into account the price that the asset would cost at present if acquired or built and reduced on the basis of economic and physical depreciation factors).

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)****1 Net interest income**

<b>Interest income</b>	<b>2009</b>	<b>2008</b>
Loans and advances to customers	424,557	376,026
Derivative instruments	57,996	69,529
Due from other banks	22,318	25,675

Operations related to derivatives	13	256
	<b>17,273</b>	<b>16,361</b>

Post Offices' commissions represent amounts paid to Bulgarian Posts for services performed on behalf of and at the expense of the Bank for the Bank's network of service desks throughout the country.

**3 Net trading (expense) / income**

	<b>2009</b>	<b>2008</b>
Foreign exchange:		
Translation gains less losses	(3,622)	(4,529)
Transaction gains less losses	493	(199)
Net results from derivative instruments	2,655	11,107
<b>Net trading income</b>	<b>(474)</b>	<b>6,379</b>

**4 Other operating expenses**

	<b>2009</b>	<b>2008</b>
Staff costs (Note 5)	54,733	73,162
Operating lease rentals	26,133	23,994
Depreciation (Note 18)	19,378	17,223
Advertising and marketing	7,463	11,085
Communication	5,756	7,996
External services	5,040	7,425
Repairs and maintenance	6,156	6,719
Security	4,897	5,400
Materials and utilities	3,399	4,440
Software costs	3,092	3,361
Other operating costs	4,855	1,072
Travel and accommodation	646	1,038
Levies and taxes	499	724
Insurance	436	436
Tax loss	-	975
Restructuring provisions write back	(4,062)	(782)
<b>Total other operating expense</b>	<b>138,421</b>	<b>164,268</b>

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)**

<b>5 Staff costs</b>	<b>2009</b>	<b>2008</b>
Wages and salaries	42,593	58,739
Pension insurance	4,853	5,842
Social security costs	3,671	4,200
Other	3,616	4,381
<b>Total staff cost</b>	<b>54,733</b>	<b>73,162</b>

The Bank estimated that the pension obligation provision as at year end is BGN 1,899 thousand (2008: BGN 1,793 thousand). See note 25.

<b>6 Provision (expense) write back for loans and advances to customers</b>	<b>2009</b>	<b>2008</b>
Loans and advances to customers (Note 12)	(110,849)	(20,450)
Credit commitments	204	(11,649)
	<b>(110,645)</b>	<b>(32,099)</b>

<b>7 Income tax expense</b>	<b>2009</b>	<b>2008</b>
Deferred tax (Note 23)	1,949	469
Current tax	119	10,449
Prior year tax expense	-	678
	<b>2,068</b>	<b>11,596</b>

Tax is payable at an actual rate of 10% (2008: 10%) on adjusted profits under Bulgarian tax law.

The tax on the operating profit differs from the theoretical amount that would arise using the basic tax rate as follows:

	<b>2009</b>	<b>2008</b>
<b>Profit before tax</b>	<b>18,175</b>	<b>102,067</b>
Tax calculated at a tax rate of 10% (2008: 10%)	1,817	10,207
Tax effect of permanent differences	251	711
Prior year tax expense	-	678
<b>Income tax expense</b>	<b>2,068</b>	<b>11,596</b>

Additional information about deferred tax is presented in Note 23.

The tax authorities may at any time inspect the books and records within 5 years subsequent to the reported tax year, and may impose additional taxes and penalties. The Bank's management is not aware of any circumstances which may give rise to a potential material liability in this respect. The last full-scope tax audit of the Bank has been carried out in 2008, covering the periods to 31 December 2007.

(All amounts are shown in BGN thousands unless otherwise stated)

## Notes to the financial statements (continued)

## 8 Income tax effects relating to comprehensive income

	Year ended 31 December					
	2009			2008		
	Before tax amount	Tax (expense) benefit	Net of tax amount	Before tax amount	Tax (expense) benefit	Net of tax amount
Available for sale investments	50,736	(5,073)	45,663	(63,162)	6,316	(56,846)
Gain on property revaluation	107	(11)	96	1,547	(155)	1,392
<b>Total</b>	<b>50,843</b>	<b>(5,084)</b>	<b>45,759</b>	<b>(61,615)</b>	<b>6,161</b>	<b>(55,454)</b>

## 9 Cash and balances with the Central Bank

	2009	2008
Cash in hand	95,100	162,319
Balances with Central bank other than mandatory reserve	268,565	124,386
Included in cash and cash equivalents (Note 28)	<b>363,665</b>	<b>286,705</b>
Mandatory reserve with Central Bank	199,262	162,679
	<b>562,927</b>	<b>449,384</b>

The Bank's balance with the Central Bank is allowed to decrease to 50% from the mandatory reserve calculated per Central Bank's regulations. The Bank is obliged to accumulate a balance with the Central Bank that equals or exceeds the mandatory reserve required by the 4th day of the month following the reporting month.

## 10 Loans and advances to banks

	2009	2008
Deposits in other banks up to 90 days from the date of acquisition	518,449	633,312
Reverse repurchase agreements up to 90 days from the date of acquisition	68,871	-
Included in cash and cash equivalents (Note 28)	<b>587,320</b>	<b>633,312</b>
Interest receivable	410	173
	<b>587,730</b>	<b>633,485</b>

Approximately 83 % (2008: 94%) of the amounts due from other banks represent funds placed in banks domiciled in OECD countries, with the remainder held with banks in Bulgaria and Romania.

(All amounts are shown in BGN thousands unless otherwise stated)

## Notes to the financial statements (continued)

**14 Other operating income**

	2009	2008
Net gain from sales of non-current fixed assets	5,134	165
Other income	146	-
	<b>5,280</b>	<b>165</b>

**15 Investment securities, held-to-maturity**

	2009	2008
Foreign government bonds	-	1,365
Listed	-	1,365

The bond has matured in 2009. Included in the amount of the investment securities for 2008, held to maturity is accrued interest in the amount of BGN 37 thousand.

**16 Other assets**

	2009	2008
Amounts in transit	4,931	4,093
Other debtors	3,010	6,956
Deferred expenses	2,683	3,098
Repossessed collaterals	2,359	1,780
Other	961	1,597
Materials	258	268
Prepayments	74	83
Less provision against other assets	(1,271)	(1,808)
	<b>13,005</b>	<b>16,067</b>

**Provision against other assets**

	2009	2008
Opening balance at 1st of January	1,808	1,432
Charged to the income statement	270	1,212
Reversed to the income statement	(127)	(212)
Used during year	(680)	(624)
Closing balance	<b>1,271</b>	<b>1,808</b>

**17 Investment property**

Investment property is held for long-term rental yields and is not occupied by the Bank. Investment property is carried at fair value, representing open market value determined by external valuers. The fair value of the investment properties is based on market prices, adjusted, for any difference in the nature, location or condition of the specific asset.

The last assessment of the investment property was performed by EFG Properties Bulgaria in 2008. Changes in fair values are recorded in the income statement as part of other income. The Bank has not recognized the amounts in income statement as at 31 December 2009.

<b>Investment property</b>	<b>2009</b>	<b>2008</b>
Beginning of the year	876	876
Net gains or losses from fair value adjustments	-	-
<b>End of the year</b>	<b>876</b>	<b>876</b>

(All amounts are shown in BGN thousands unless otherwise stated)

Net book amount	<b>45,604</b>	<b>61,026</b>	<b>106,630</b>

The Bank's land and buildings were last revalued on 31 December 2008 by independent valuers. Valuations were made on the basis of recent market transactions on arm's length terms. The revaluation surplus net of applicable deferred income taxes was credited to property and equipment revaluation reserve in shareholders' equity.

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)**

19	<b>Deposits from Banks</b>	<b>2009</b>	<b>2008</b>
	Items in course of collection	14,145	23,681
	Deposits from other banks	155,192	103,193
	Repurchase agreements	202,705	152,771
		<u>372,042</u>	<u>279,645</u>

Included within due to other banks is related accrued interest payable of BGN 1,694 thousand (2008: BGN 996 thousand).

**20 Derivative financial instruments**

The Bank utilizes currency forwards, currency swaps, interest rate swaps, cross currency interest rate swaps and interest rate futures, which are negotiated between the Bank and counterparties for both hedging and non-hedging purposes.

Currency forwards represent commitments to purchase foreign and domestic currency, including undelivered spot transactions.

Currency swaps are commitments to exchange one set of cash flows for another. Swaps result in an economic exchange of currencies or a combination of currencies or interest rates (i.e., cross-currency interest rate swaps). The Bank's credit risk represents the potential cost to replace the swap contracts if counterparties fail to fulfill their obligation. This risk is monitored on an ongoing basis with reference to the current fair value, a proportion of the notional amount of the contracts and the liquidity of the market. To control the level of credit risk taken, the Bank assesses counterparties using the same techniques as for its lending activities.

Interest rate swaps are commitments to exchange one set of cash flows for another. Swaps result in an economic exchange of interest rates. No exchange of principal takes place; therefore the credit risk is negligible.

Interest rate futures are contractual obligations to receive or pay a net amount based on changes in interest rates. The credit risk is negligible, as futures contracts are collateralized by cash or marketable securities, and changes in the futures' contract value are settled daily with the exchange. Forward rate agreements are individually negotiated interest rate futures that call for a cash settlement at a future date for the difference between a contracted rate of interest and the current market rate, based on a notional principal amount.

The notional amounts of certain types of financial instrument provide a basis for comparison with instruments recognized on the balance sheet but do not necessarily indicate the amounts of future cash flows involved or the current fair value of the instruments and, therefore, do not indicate the Bank's exposure to credit or price risks. The derivative instruments become favorable (assets) or unfavorable (liabilities) as a result of fluctuations in market interest or foreign exchange rates relative to their terms. The aggregate contractual or notional amount of derivative financial instruments on hand, the extent to which, instruments are favourable or unfavorable, and thus the aggregate fair values of derivative financial assets and liabilities can fluctuate significantly from time to time. The fair values of derivative instruments held are set out below.

(All amounts are shown in BGN thousands unless otherwise stated)

## Notes to the financial statements (continued)

## 20 Derivative financial instruments and hedging activities (continued)

	Contract / notional amount	Assets	Liabilities
<b>Year ended 31 December 2009</b>

**Notes to the financial statements (continued)**

**20 Derivative financial instruments and hedging activities (continued)**

The Bank hedges part of its existing interest rate risk resulting from any potential decrease in the fair value of fixed rate assets denominated in foreign currencies using interest rate swaps. The fair value of these swaps at 31 December 2009 was positive BGN 87 thousand (2008: 184 thousand) and negative BGN 29,215 thousand (2008: 19,939 thousand).

The loss on the hedging instruments were BGN 2,611 thousand (2008: loss 21,542 thousand). The gains on the hedged item attributable to the hedged risk were BGN 3,483 thousand (2008: gains 21,362 thousand). In 2009 the effectiveness arising from fair value hedges, recognized in income statements is BGN 872 thousand (2008: 180 thousand).

**21 Due to customers**

	<b>2009</b>	<b>2008</b>
Large corporate customers	1,346,766	945,207
Medium corporate customers	105,034	134,684
<b>Total due to corporate customers</b>	<b>1,451,800</b>	<b>1,079,891</b>
Retail customers	2,880,869	2,768,352
<b>Total due to customers</b>	<b>4,332,669</b>	<b>3,848,243</b>

Included within due to customers is related accrued interest payable of BGN 52,544 thousand (2008: BGN 20,477 thousand).

**22 Debt issued and other borrowed funds**

	<b>2009</b>	<b>2008</b>
Debt securities in issue	39,992	74,371
Subordinated debt	93,864	189,487

<b>Total debt issued and Other borrowed funds</b>	<b>476,331</b>	<b>694,246</b>

**a) Debt securities in issue**

In April 2007 corporate bonds with nominal amount of BGN 40,000 thousand were issued. The bonds carry floating rate coupon based on 3 month SOFIBOR rate plus 0.8%. The outstanding balance as at 31 December 2009 is BGN 39,992 thousand (2008: BGN 40,337 thousand).

In July 2009 Eurobank EFG Bulgaria redeemed corporate bonds with nominal amount BGN 33,750 thousand, issued in July 2006.

**b) Subordinated debt and Debt equity (hybrid) financial instruments**

In March 2005, DZI Bank signed subordinated debt agreement for total amount of BGN 25,000 thousand. The long term debt has ten years maturity and a fixed interest rate of 6,5%. As at 31 December 2009 the total liability amounted to BGN 29,132 thousand (2008: BGN 27,731 thousand).

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)**

**22 Debt issued and Other borrowed funds (continued)**

In November 2006, all rights and obligations /including the receivables/, held by the legal entities under agreements concluded by DZI Bank have been transferred to Eurobank EFG Holding /Luxembourg/ S.A., whereas all contractual terms remain unchanged.

In June 2007, Eurobank EFG Bulgaria signed subordinated term debt agreement with EFG Eurobank Ergasias. The agreement is for BGN 58,674 thousands at floating rate of 3 month Euribor plus 0.5%. As at 31 December 2009 the total liability amounted to BGN 64,732 thousand (2008: BGN 60,658 thousand).

In July 2009 Eurobank EFG Bulgaria redeemed debt-capital (hybrid) notes with principal amount of BGN 11,000 thousand contracted in March 2005.

In July 2009 Eurobank EFG Bulgaria redeemed debt-capital (hybrid) notes with principal amount of BGN 97,792 thousand and subordinated debt term facility with principal amount of BGN 97,792 thousand, contracted in June 2008.

**c) *Loans received from The European Bank for Reconstruction and Development***

In August 2006, Eurobank EFG Bulgaria and the European Bank for Reconstruction and Development executed Loan Agreement whereby the Bank can borrow EUR 5,000 thousand (BGN 9,779 thousand) for the purposes of granting loans for improving rational energy utilization in Republic of Bulgaria. In December 2006, the amount of the loan was increased by EUR 15,000 thousand (BGN 29,337 thousand). As at 31 December 2009 the total liability amounted to BGN 12,043 thousand. (2008: BGN 14,542 thousand).

In February 2006 Eurobank EFG Bulgaria and the European Bank for Reconstruction and Development executed Loan Agreement whereby the Bank can borrow up to EUR 5,000 thousand (BGN 9,779 thousand). The granted funds are used for funding residential energy efficiency and small renewable energy investments of individual households in the Republic of Bulgaria. As at 31 December 2009 the total liability amounted to BGN 3,725 thousands. (2008: BGN 7,072 thousand).

In July 2008, Eurobank EFG Bulgaria and the European Bank for Reconstruction and Development executed Loan Agreement whereby the Bank can borrow up to EUR 25,000 thousand (BGN 48,896 thousand) for the purpose of granting funds to small and medium-sized enterprises in the form of Small and Micro Loans. As at 31 December 2009 the total liability amounted to BGN 13,616 thousand. (2008: 5,683 thousand) According to the loan agreements with the European Bank for Reconstruction and Development, the Bank is required to comply with certain financial and non-financial covenants.

**d) *Syndicated loan***

In June 2008, Eurobank EFG Bulgaria signed Syndicated Loan Agreement for the total amount of BGN 293,375 thousands. The long term debt has a two years maturity at floating rate of 1 month Euribor plus 0.65%. As at 31 December 2009 the total liability amounted to BGN 293,088 thousand (2008: BGN 292,595 thousand).

**e) *Loans received from the Bulgarian Development Bank***

In February 2009, Eurobank EFG Bulgaria and the Bulgarian Development Bank executed Loan Agreement whereby the Bank can borrow BGN 20,000 thousand. This loan is part of the government measures package, aiming to minimise the global financial crisis impact over the Bulgarian economy. The purpose of the granted funds is long term financing of small and medium enterprises registered by the Trade Law. The long term debt has ten years maturity and a fixed interest rate of 5.0 %. As at 31 December 2009 the total liability amounted to BGN 20,003 thousand (2008: nil).

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)****23 Deferred income taxes**

Deferred income taxes are calculated on all temporary differences under the liability method using a principal tax rate of 10% (2008: 10%). The movement on the deferred income tax account is as follows:

	2009	2008
Income statement charge (Note 7)	1,949	469
Deferred tax liability at beginning of year	816	3,937
(Credit)/debit to revaluation reserves in equity	(96)	(19)
Reclassification from deferred tax liability to current tax	-	(3,571)
<b>Deferred tax liability at end of year</b>	<b>2,669</b>	<b>816</b>

Deferred income tax assets and liabilities are attributable to the following items

	2009	2008
<b>Deferred income tax liabilities</b>		
Accelerated tax depreciation	3,052	2,413
Property revaluation	266	363
	<b>3,318</b>	<b>2,776</b>
<b>Deferred income tax assets</b>		
Unused holidays	163	126
Provision for court claims	47	23
Provision for retirement obligations	190	179
Restructuring provisions	-	406
Other temporary differences	249	1,226
	<b>649</b>	<b>1,960</b>

The deferred tax charge/(credit) in the income statement comprises the following temporary differences:

	2009	2008
Depreciation	640	716
Unused holidays	(37)	(16)
Provision for court claims and off balances	(24)	60
Provision for retirement obligations	(11)	43
Restructuring provisions	406	104
Other Temporary Differences	975	(438)
<b>Net deferred tax charge</b>	<b>1,949</b>	<b>469</b>

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)**

**24 Provisions for other liabilities and charges**

*(a) Legal proceedings*

The Bank is subject to a number of legal proceedings arising in the normal course of business. The timing of the expected cash outflow of the court cases provided for could not be reliably estimated. Based on management's estimation it is expected that in two years time the outflow may be realized.

The table below represents the movement in provisions for legal claims:

<b>Legal provisions</b>	<b>2009</b>	<b>2008</b>
Opening balance at 1st of January	232	282
Charged to the income statement	301	(31)
Used during year	(60)	(19)
Closing balance	<u>473</u>	<u>232</u>

*(b) Provisions for restructuring*

In pursuance of EFG Group's goal for achievements of internal optimization of its subsidiaries, in 2007 Postbank and DZI bank started procedure for transformation by way of merger of DZI bank into Postbank. Based on restructuring plan, developed and announced by the management, it was decided provisions for restructuring to be set up. The provisions were booked in accordance with the requirements of IAS 37 "Provisions, Contingent liabilities and Contingent assets" and reflect the best estimate of the management for the expenditures needed to be settled.

The table below represents the movement in restructuring provisions:

<b>Restructuring provisions</b>	<b>2009</b>	<b>2008</b>
Opening balance at 1st of January	4,062	5,103
Reversed to the income statement	(4,062)	(782)
Used during year	-	(259)
Closing balance	<u>-</u>	<u>4,062</u>
<b>Provisions used during the year</b>	<b>2009</b>	<b>2008</b>
Audit and consultancy expenses	-	199
Other expenses	-	60
<b>Total</b>	<u>-</u>	<u>259</u>

(All amounts are shown in BGN thousands unless otherwise stated)

**Notes to the financial statements (continued)****24 Provisions for other liabilities and charges (continued)***(c) Assets pledged*

Mandatory reserve deposits are held with the Central Bank in accordance with statutory requirements.

	Asset		Related liability	
	2009	2008	2009	2008
Mandatory reserves with BNB	398,525	324,684	4,902,466	4,058,434
Trading and Investment Securities	350,347	315,171	291,009	287,884
	<b>748,872</b>	<b>639,855</b>	<b>5,193,475</b>	<b>4,346,318</b>

The total financial assets that have been pledged as collateral for liabilities (including amounts reflected above) at 31 December 2009 was BGN 748,872 thousand (2008: BGN 639,855 thousand). These transactions are conducted under terms that are usual and customary to standard lending, and securities borrowing and lending activities, as well as requirements determined by exchanges where the Bank acts as an intermediary.

The Bank has entered into reverse repurchase agreements with financial institutions and other clients for the total amount of BGN 73,686 thousand (2008: BGN 9,385 thousand). The Bank has accepted bonds and shares at fair value 81,696 thousand (2008: 11,172 thousand) as collateral, which it is permitted to sell or repledge. The collaterals accepted have not been repledged or lent to third parties.

<b>25 Retirement benefits obligations</b>	<b>2009</b>	<b>2008</b>
