

Sustainable Finance Framework

Committed to being transparent about our ESG approach, we developed our Sustainable Finance Framework, which covers a wide range of sustainable retail and wholesale lending products.

The Eurobank Sustainable Finance Framework outlines our approach for classifying sustainable lending solutions and defines which activities are eligible to access sustainable financing (green and social assets). A wide range of sustainable products and exposures fall under the scope of our Framework, including:

- Green and Social Lending – Financing specific client projects that meet the eligibility criteria.
- Company Business Mix – Financing companies with revenue generated mainly from the eligible activities.
- Sustainability-linked Loans and Facilities – Financing clients who set specific sustainability performance targets and incentives.
- Recovery and Resilience Facility – Financing specific projects that fall within the scope of the RRF plan.

To develop our Sustainable Finance Framework, we have drawn on internationally recognised industry guidelines and principles:

- The ICMA principles for bonds – [Green Bond Principles](#), [Social Bond Principles](#), [Sustainability-Linked Bond Principles](#)
- The LMA principles for loans – [Green Loan Principles](#), [Sustainability-Linked Loan Principles](#)
- The [EU Taxonomy Climate Delegated Act](#)
