## **HIGHLIGHTS**

## **WORLD ECONOMIC & MARKET DEVELOPMENTS**

**GLOBAL MARKETS:** US Treasuries remained under pressure and the USD retained a firm tone against most of its major currency peers following a string of hawkish comments by two Fed officials supporting expectations of further Fed rate tightening in the near future.

**GREECE:** Following recent approval by the Hellenic Parliament of the relevant legislation required for the implementation of prior actions attached to the 1<sup>st</sup> programme review, the Eurogroup which convenes later today (15:00 CEST) is reportedly expected to open the door for the release of the next loan tranche. With respect to debt relief, a number of press reports suggested that today's Eurogroup is unlikely to reach a final agreement as a divergence of views on the issue continues to exist between European creditors and the IMF.

## **SOUTH EASTERN EUROPE**

**CYPRUS:** A more fragmented new parliament emerged from the elections in the Republic of Cyprus on May 22<sup>nd</sup>.

## Latest world economic & market developments

## **GLOBAL MARKETS**

US Treasuries remained under pressure and the USD retained a firm tone against most of its major currency peers following a string of hawkish comments by two Fed officials on Monday supporting expectations of further Fed rate tightening in the near future. Philadelphia Fed President Patrick Harker stressed that a June rate hike is appropriate unless US data disappoints while, adopting a similar stance, St. Louis Fed President James Bullard cautioned that holding interest rates too low for too long could cause financial instability in future. Short-dated US notes underperformed with the 2-yr paper yielding levels near 0.905% at the time of writing, not far from a multi-week closing high of 0.92% recorded a couple of sessions ago. Against a broadly firmer USD, the EUR/USD hit a session trough of 1.1167 earlier today, the lowest in near two months while the Euro area flash composite PMI for May which came in slightly weaker than expected, may also had an impact (down to 52.9 from 53.0 in April). Looking at today's calendar, focus is on US new home sales for April while BoE Governor Mark Carney and a number of MPC members will testify today before the Treasury Select Committee on the Bank's May Inflation Report.

## **GREECE**

Following recent approval by the Hellenic Parliament of the relevant legislation required for the implementation of prior actions attached to the 1<sup>st</sup> programme review, the Eurogroup which convenes later today (15:00 CEST) is reportedly expected to open the door for the release of the next loan tranche. As per the same sources, the said tranche is likely to amount to €11bn consisting of €3.8bn for the clearance of state arrears and €7.2bn for the coverage of debt interest and amortization payments until November 2016. The former amount will be reportedly released in the form of monthly sub-tranches conditional on the accomplishment of certain prior actions. According to the Euroworking Group that met yesterday, certain issues related to the completion of the review need to be amended including the NPL resolution framework (e.g., without official creditors' consensus the relevant legislation envisioned NPLs collateralized with Greek State guarantees to be excluded indefinitely from the scope of permitted sales) or have yet to be fully completed (i.e., approval by the Hellenic Parliament of the privatization plan of the former Ellinikon International Airport). With respect to debt relief, a number of press reports suggested that today's Eurogroup is unlikely to reach a final agreement as a divergence of views on the issue continues to exist between European creditors and the IMF. In its updated debt sustainability analysis that was published yesterday, the IMF openly disputed Greece's capacity to sustain a primary surplus target of 3.5%-of-GDP in the long term "considering its still weak policy making institutions and projections suggesting that unemployment will remain at double digits for several decades". The IMF insisted that the DSA should be based on a primary surplus over the long-run of no more than 1.5%-of-GDP. It also underlined that any debt restructuring solution would need to meet two key objectives: (i) gross financing needs to be maintained with the 15-20% of GDP thresholds throughout the projection period (2060); and (ii) to ensure that "debt is on a sustained downward path". In addition, the Fund stressed that the implementation of debt relief should be completed by the end of the program period, contingent on program implementation. The IMF proposed several debt relief measures including maturing extension payment deferrals and a fixed interest rate up to 1.5% until 2040.

## Latest world economic & market developments in the CESEE region

## **CYPRUS**

A more fragmented new parliament emerged from the elections in the Republic of Cyprus on May 22<sup>nd</sup>. Despite the heightened electoral threshold (3.6% vs. 1.8% previously) plus one of the lowest voters' turnouts in the history of the Republic-the abstention rate was 32.6%-eight parties entered the new parliament. The ruling right-wing party DHSY gained 37.6% of the vote (18 seats), the main opposition left-wing party AKEL gained 25.7% (16 seats), and DHKO gained 14.5% (9 seats). Five other smaller parties, EDEK: 6.2% (3 seats), Citizens Alliance: 6.0% (3 seats), Solidarity: 5.2% (3 seats), Green Party: 4.8% (2 seats) and far right-wing ELAM: 3.7% (2 seats) were allocated a number of 13 seats compared to only 8 in the previous elections in 2011.

The parliamentary elections results are not a game changer as they have no direct impact on the formation of the government, as the system of the Republic is presidential. Nevertheless, elections are still considered a crucial test for the popularity of the incumbent President Anastasiadis whose term is set to expire in 2018. At first sight, it appears that the casualties for the ruling party are low yet not minimized. Even though DHSY was first in popular support, it still lost 3.5 ppts off their electoral base while their major opponent lost more than 7 ppts. A large part, if not all, of DHSY's lost votes were leaked to the Solidarity party whose leader was a former Euro parliament MP of DHSY. On the other hand, the ruling party will be more dependent on smaller parties to pass legislation in the parliament.

As the next Presidential elections will be approaching, it is also highly likely that the new parliament is going to be less friendly to the ruling party than the outgoing. This is not very encouraging given that there is a number of pending important structural reforms of the economic adjustment program that will allow the Cypriot economy not to backtrack. Still, a handful of unfinished structural reforms need to progress in the areas of privatizations, public and health sectors, while addressing the challenges of a still high NPLs stock 48.9% in February 2016, up from 45.8% in December 2015 together with a still relatively high ELA exposure (€3.2bn in April 2016 or 18.1% of projected GDP down from €11.4bn in March 2013)

Cyprus has made significant adjustment progress within the program in a number of areas including, but not limited to, restoring the health of the banking sector, a complete lift of capital controls, the fixing of public finances and addressing of earlier macroeconomic imbalances. After a three year recession in 2012-2014 the economy expanded by +1.6% YoY in 2015 and is expected to gain further momentum above +2% YoY in 2016. This forecast stands above the most recent EU Commission Spring forecast of +1.7%, as lower energy prices, strong sentiment improvement, the lagged effect from Euro depreciation, the lack of additional fiscal austerity measures and a flourishing tourism sector are expected to provide more support to consumption's recovery and net exports.
